

HOLIDAY GIFT GUIDE

I.D. WATCH

This Bluetooth watch helps parents keep an eye on their little offspring : the device acts as some kind of geo-fence, making sure that the child remains within a safe range of its parent's Bluetooth-enabled handset at all times.

Of course, the "safe range" can be adjusted at will by simply pressing a few buttons on the child's watch.

Another strong point is its design: the device being very kid-friendly, parents can be that the child will want to wear it at all times.

Suggested Retail Price: € 97.90
